

Christina Strawbridge: Stronger emergency response system needed in Industrial Park

Benicia Herald, May 15, 2018

In her May 6 letter, Kathy Kerridge brought up an important point about adopting a Industrial Safety Ordinance (ISO). There have been several letters and information about what would be covered in an ISO. Although I have not seen a final draft of the ISO, as it has not been completed nor distributed for review, Kathy's point about the Benicia Industrial Park needing a more developed emergency response system makes sense. Coordinating those systems with Valero and the city of Benicia would provide additional safety and peace of mind for our residents and those businesses in the Park.
