

A clear choice for health

By Nikki Basch Davis, September 30, 2018

I moved to Benicia fifteen years ago, knowing it to be a small, safe, friendly community. My daughter and three grandchildren followed. I am responsible for their presence in this town. I am deeply committed to their health and safety.

The last Valero's power failure, in May 2017 engulfed Benicia with black smoke and left my lungs aching. What did it do to young developing lungs?

Mr. L supported Valero's request to bring crude oil by rail to Benicia. He is distancing himself from this issue now, a few weeks before the election, but he did support it in the past. Kari Birdseye voted against Crude By Rail while on the Planning Commission.

Kari Birdseye's has passion for environmental issues, including clean air and water. She spent her career being involved in issues of health and safety in our community as a chair of our Planning Commission and in city planning.

Mr. L is employed by a consulting firm, one of whose major clients is Valero.

My grandchildren's health is a priority. I choose Kari Birdseye.
