

**County of Santa Clara
Office of the County Executive**

DATE: May 26, 2020

TO: Board of Supervisors

FROM: Jeffrey V. Smith, County Executive
Michelle A. Jorden, MD, Chief Medical Examiner-Coroner

SUBJECT: Item 6 Supplemental Information: Morbidity Dashboard

Overview:

The Medical Examiner-Coroner's (ME-C) Office investigates any human death that falls within any of the following categories (California State Government Code 27491):

- criminal violence
- suicide
- accident
- suddenly when in apparent good health
- suspicious or unusual circumstances
- poisoning or attributable to an adverse reaction to drugs and/or alcohol
- contagious disease
- injury or toxic agent resulting from employment
- during some medical diagnostic or therapeutic procedures
- in any prison or in police custody

All decedents who are COVID-19 positive are reportable to the Medical Examiner-Coroner, and the Medical Examiner-Coroner certifies deaths pertaining to COVID-19. For non-COVID-19 deaths, the Medical Examiner-Coroner certifies a small subset of deaths in the County of Santa Clara and as such, cannot provide total death counts. For those deaths certified under the Medical Examiner-Coroner, death statistics are available and can be displayed in a dashboard format.

This report contains a table of the 139 COVID-19 certified deaths as of May 20, 2020 below, and the ME-C is in the process of upgrading their electronic database known as VertiQ, in order to support the creation of a dashboard that would be accessible to the public on the ME-C website.

The plan is to have a de-identified interactive dashboard on the ME-C website with maps and an open dataset to provide the public with crucial information about all ME-C deaths. The case records of the ME-C provide a unique lens through which to examine the impacts of everything from suicides, drugs to cold-related deaths, in addition to COVID-19. The geographic data can

assist government agencies and other stakeholders to design interventions that target the areas of greatest need.

The maps and dashboard will be populated by an online database, updated nightly and will be open to the public on the County's website. The dashboard will summarize the number of deaths that were handled by the ME-C, and include cause and manner of death (i.e. natural, homicide, accidents, suicides), decedent demographics (age, ethnicity/race, zip code of residence, zip code of death), the location of death, and manners of death including heat mapping of deaths within the various zip codes. The dashboard will display the number and types of death in various zip codes (i.e. number of opioid and methamphetamine deaths, homicides, motor vehicle fatalities, current COVID-19 pandemic deaths).

COVID-19 Death Data:

All decedents who are COVID-19 positive are reportable to the Medical Examiner-Coroner. The Medical Examiner-Coroner certifies deaths pertaining to COVID-19.

The deaths listed below reflect those who died in the County (regardless of where they live). As all COVID-positive deaths are reportable to the ME-C, these deaths are personally reviewed by the Chief Medical Examiner-Coroner to ensure causes of death are consistent with the ME-C and National Vital Statistics System (NVSS) standards.

The following list below represents 139 COVID-19 certified deaths as of May 20, 2020:
